

## Kite-mentoring training

### Know Your competencies – Find Your Job: Job Search and career development for Scientists

**Date:** Wednesday 10.07.2024 (9:30 – 16:30)

**Location:** Faculty of Engineering, Univ. Freiburg, Georges-Köhler-Allee, building 080 - seminar room

**Invited trainer:** Dr. Matthias Schwarzkopf (Jena) - <https://www.kabeak.de>

**Registration:** <https://nuudel.digitalcourage.de/YhTY5CRTE24jswoD>

Scientists have a lot of job options -- but they are often not aware of them. This workshop will help you see more of the many opportunities there are on the German and Swiss labour market. You will learn to take the different steps involved in a successful job search: in particular, to be aware of your competencies, skills and knowledge and to build your career strategies based upon them.

Topics:

- My competencies, skills and knowledge: how to know them and how to use them
- German and international labour markets: how markets influence my job search
- Job search strategies: Searching with search engines and why this is not enough – different ways and strategies for job search.
- Job search beside Research and Development departments – what else is there?
- How to use personal and electronic networks like LinkedIn for job search?
- Founding your own business: How to create your own job and how to earn money with it?
- Outlook: Where to find information on written application and job interviews and how to use ChatGPT as support tool

Please bring an internet-enabled device with you – we will need it for the job search.
