

# Let Life *Sciences* meet you

Online event

## ***How to Start-Up***

**Thursday, 22 July 2021 – 19:00 – 20:30**

In cooperation with btS you have the opportunity to join the event

### **"How to Start-Up?"**

What could be more exciting than turning your own idea into something really big? Founding a start-up is an adventure and a challenge at the same time. We invite the two Freiburg companies, **CapCo Bio GmbH** and **realworld one**, who dared to take this step.

**CapCo Bio GmbH** wants to revolutionize the transport of molecules into eukaryotic cells with its unique, newly developed technology. The IP consists of biodegradable submicron and nanocapsules that can be loaded with nucleic acids or other cargo. This breakthrough technology will open completely new venues for the research in the molecular basis and in the treatment of diseases like cancer, Alzheimer's, immune disorders, diabetes and infectious diseases.

**realworld one** is one of the world's leading provider of virtual reality (VR) and augmented reality (AR) software solutions for the life sciences, analytics and diagnostics, medical technology, pharmaceutical and chemical industry, as well as process technology. To realworld one customers belong companies such as Lonza, ZEISS, Bio-Rad, Becton Dickinson, Beckman Coulter Life Sciences, QIAGEN, Tecan, Hologic and GEA.

Currently, more than 250 employees work at the headquarter in Freiburg as well as at other locations in the USA, India and China.

This online event will last about 1.5 hours. If you are interested, please register under the link <https://limesurvey.bts-ev.de/index.php/293852?lang=de> and a survey with 5 question will open.

You will get the link for the online event via email before the meeting

Lecture online
