

Round-table discussion on **„Success Factors for a Research Career – Advice from a Leibniz Prize-Winner and the Former Vice-President of the DFG“**

Target Group:	Postdocs, Clinician Scientists, Researchers & Professors
Time and venue:	23 June 2022 01:00 – 03:00 p.m. Lecture Hall at the Department of Obstetrics and Gynecology
Organisation:	Office of the Dean for Research, Research Services, Faculty of Medicine
Programme:	How to Become a Leibniz Prize-Winner – Success Factors for a Research Career <i>Prof. Marco Prinz, Institute of Neuropathology</i> Cutting-Edge Research in the Medical Field – Recommendations from the Former Vice-President of the DFG <i>Prof. Leena Bruckner-Tuderman, Department of Dermatology</i>

Description:

The Gottfried Wilhelm Leibniz Prize, which is endowed with up to EUR 2.5 million, is the most important research award in Germany and is awarded annually by the DFG. Prof. Marco Prinz was awarded the Gottfried Wilhelm Leibniz Prize in 2020 for his outstanding work in the field of neuroimmunology. In this round-table discussion Prof. Prinz will talk about the secrets to his successful research career and circumstances that are important in facilitating cutting-edge research.

Prof. Leena Bruckner-Tuderman, former Vice-President of the DFG, will talk about framework conditions, which are essential for conducting excellent research in the medical field. As previous chairperson of the Permanent Senate Commission on Key Questions in Clinical Research, she played a key role in the development of basic recommendations in this field.

Note:

Please note that the round-table discussion will be organized as an **on-site event** provided that the current Covid-19 situation permits. Please note that **registration in advance** ([link](#)) is required to attend the event. Further details on the round-table discussion can be found on our [website](#).
