

# Explore your Future Perspectives – BrainLinks-BrainTools Career Dinner 2019

## What?

Explore your career perspectives in a relaxed atmosphere and small discussion groups during dinner. Our invited guests cover different fields such as research, industry, start-ups from sciences, engineering and computer sciences!

## All you need to know...

### Who?

All BrainLinks-BrainTools Junior Scientists are warmly invited. Members of the BrainLinks-BrainTools Graduate Program have priority in participating.

### When?

Thursday, 11<sup>th</sup> of July 2019  
From 6 to ~10 pm

### Where?

Haus zur Lieben Hand  
Löwenstraße 16  
79098 Freiburg

## Questions and Contact

## LET'S TALK ABOUT YOUR CAREER

25/07/2019

**For the fourth time, BrainLinks-BrainTools organized the Career Dinner for PhD students and Postdocs within the research cluster.**

This year ten guests from very different fields of work and companies were invited to meet our early career researcher: With a background in biology, a business and analytics manager from Janssen-Cilag GmbH and a study coordinator from the University of Freiburg joined the event. Two computer scientists, a software engineer from Google and a senior researcher from KUKA Deutschland GmbH, also participated. Fitting to the scope of BrainLinks-BrainTools, several guests from biomedical and biochemical companies were invited: A founder and chief scientific officer of the start-up company SPINDIAG GmbH, a founder and CTO of Vibrosonic GmbH, a research engineer from em-tec GmbH and the CTO of OSYPKA AG. Besides that, a programme officer from the DFG joined the evening as well as a professor from the DHBW Lörrach.

During the dinner, the junior scientists got the chance to explore career opportunities and perspectives in a relaxed atmosphere with the guests. It was again a very successful evening with only positive feedback from guests and participants.

Last but not least a big thank you goes to the organizers of this years event: Marie Alt and Angelina Müller!
