Registration: <https://terminplaner4.dfn.de/Ai5AaLzK5iIMvP8n>

Being a scientist and working in a consultancy? You are wondering how this looks like? ANNIKA HESSELING and MARIANN OEMISCH, both with an educational background in biology / neurology are now working as consultants for the Boston Consulting Group (BCG) and will talk about how they ended up in a consultancy instead of wearing a lab coat and how their days at BCG look like. They will provide insights into which projects scientists work on at BCG and challenge stereotypes you might have on your mind.

We are looking forward to meeting you! Our guests Annika and Mariann will give short inputs and share their experience followed by a Q&A session
