**Location:** zoom lecture  
Link will be delivered in advance

**Registration:** <https://doodle.com/poll/7vsv8kmu6yb74p3h>  
Please register via doodle

**Objectives:** Lecture and discussion with IRINA FRIEDEMANN (Freiburg) about finances, money, risks and about how women can reach financial independence and age security.

*“Finances, risks, money”* are actually not general typical women’s topics. Little is said about it, or so complicated explained, that nobody can understand it properly, although the whole life around us has a lot to do with money.

**Goals of the lecture** are:

- To explain how economy works and how these laws are functioning and how they could work for you;
- To show easily and understandable with the help of practical examples how the financial / real estate markets work;
- To rise awareness about possible financial risks of women, how women can identify, assess and properly manage these risks;
- To explain how women by themselves can reach financial independence!

After the lecture there will be time for discussion and consultancy (in groups and individual). If you have some specific request in this topic, please let us know in advance.

Please note: IRINA FRIEDEMANN is not selling any products, funds, shares, insurances.... she is completely independent just asking critical questions and sharing her own opinion.
