VIRTUAL MEETUP

Women in STEM Virtual Meetup

October 28th, 17:00-19:00

Dear Women,

I am looking forward to seeing you all this Wednesday for our third Women in STEM Virtual Meetup.

This month we will have Lou Penicaud and Manika Arora from Jedox, one of the fastest-growing tech companies in Germany as our speakers. Our theme for October is Thriving in a Challenging Environment. Lou and Manika will be talking about their paths, their careers and their experiences in the booming software industry.

You'll be able to join the meeting by using the Zoom link button below.

Have questions? Either respond to this email or contact me

at: info@francescacarlin.com

See you on Wednesday!

Francesca

The Guest Speakers

Lou Penicaud

Lou Penicaud is a French Human Resources professional with 7 years of experience across various fields of HR.

In Germany for four years, she has been working two years for a global automotive provider and two for an international Software company, in global positions. From the mysteries of German work law to settling a new office in Dubai, it has been her constant focus to keep the “human” in Human Resources, also in an extremely challenging environment.

Manika Arora

Manika Arora is a 27 years old Software Engineer AI at Jedox AG, Freiburg. She obtained a Bachelor of Engineering degree in Electronics and Communication from Panjab University, India in 2015. She came to Germany in the summer of 2016 to study computer science and received her Master's degree from the University of Freiburg in February 2019.

She has been working for Jedox since June 2017, first as a working student and now full time. In her free time she enjoys reading, baking and DIY crafts.
